TITLE

Lenses Arrangement for Microscopic Observation Operationally Combined with an Image Acquisition Device and a Light Source

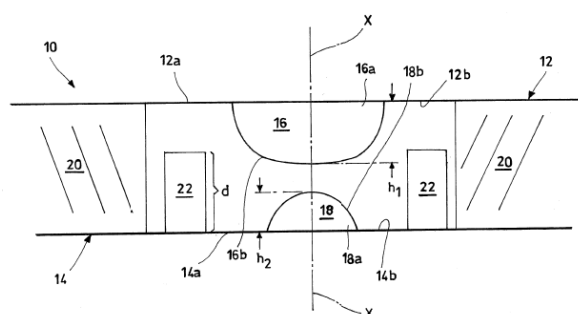

INVENTORS

Andrea ANTONINI

DESCRIPTION

The present invention relates to a lens system designed for microscopic observation and operably coupled with an image acquisition device and a light source.

Fig.1

APPLICATIONS

Portable Microscopy

KEYWORDS

Microscopy, smartphones, portable devices, images, light

BIBLIOGRAPHIC DATA

Sistema Di Lenti Destinato All'Osservazione Microscopica Ed Operativamente Accoppiabile Con Un Dispositivo Di Acquisizione Di Immagini Ed Una Sorgente Di Luce

Application Number IT 102017000132836

Priority Date November 21, 2017

Applicants Fondazione Istituto Italiano di Tecnologia, Smart Micro Optics
