DI TECNOLOGIA

#### TITLE

Multilayer Material

#### INVENTORS

Gabriele NANNI, Ilker BAYER

#### DESCRIPTION

The present invention relates generally to the field of engineered materials, and more specifically it relates to a new improved multilayer material, a process for its preparation and articles made of such material. In particular articles intended to be exposed to adverse conditions, such as strong winds, stretching, temperature variations, such as boat sails.

#### APPLICATIONS

Engineered materials

#### KEYWORDS

Resistant materials, winds, sails, engineered materials

#### BIBLIOGRAPHIC DATA

Materiale Multistrato

Application Number IT 102018000008877

Priority Date September 24, 2018

Applicants Fondazione Istituto Italiano di Tecnologia

#### CONTACTS
